Learn the basics of web design, including box model, positioning, color theory, typography, and more. If you are a personal blogger and also in WordPress then I must say, the combination is perfect. WordPress initially started out as a cute blogging platform and with continuous development and volunteers behind it, it is now a giant in the web world. Blogging is a phenomenal thing that connects with your hobbies. Maybe you just had a tasty recipe in a new restaurant, maybe you visited the Himalayas of Nepal on holiday, maybe you bought a new mac book pro you've been waiting for, you might want to talk about the photography techniques you learned, maybe you've visited a summer fashion show in Paris or anything, now, you might want to talk about it and share your experience and knowledge, blogging about it right away in your personal blog is a terrible way to do it. While the whole blogging thing is up to you, it's important that your blog looks beautiful, professional, easy to read and well structured to be well ranked in the main search engines. In addition, we both know that your visitors will mostly read about your blog in their mobile devices, so your blog must also react. This will fully help you gather more visitors and make them part of your experience that you share on your blog. This post is all about finding the right WordPress blogger theme that will suit your blog content & character.
