Dbx driverack pa setup

latest version of the JBL Pro Connect app. Control JBL Professional PRX ONE, EON700 or EON ONE MK2 portable PA system right from your iPhone or iPad with the free JBL Pro Connect app. Control JBL Professional PRX ONE, EON700 or EON ONE MK2 portable PA speakers directly from your iPhone® or iPad® with the free JBL Pro Connect app. Using Bluetooth® Low Energy (BLE) technology, JBL Pro Connect gives you complete hands-on control over all of your PA system's built-in mixer and DSP functions. Build your ideal PA system by syncing up to 10 PRX ONE, EON700 or EON ONE MK2 speakers. JBL Pro Connect gives you all of the tools to sound your best, right at your fingertips. Dial in your signature sound from anywhere in the room: Set volume levels, adjust EQ settings, activate Lexicon reverb and effects and dbx Digital DriveRack signal processing, customize ducking, save and recall presets and much more. Whether you're a seasoned musician, DJ or presenter or just starting out on your live sound journey, JBL Pro Connect makes it easy to tailor your tones for any venue or application. FULL CONTROL, IN THE PALM OF YOUR HAND: Manage JBL PRX ONE, EON700 or EON ONE MK2 portable PA speakers from your iPhone or iPad. Dive deep into system mixer and DSP functions to optimize your stage sound for any scenario. Access app-exclusive features and speaker settings including snapshots, multi-speaker grouping, tap tempo and more. ELEVATE YOUR STAGE SOUND WITH PRO EFFECTS: Activate ducking to make sure your voice stands out over background music. Adjust Lexicon reverb, chorus and delay effects for professional polish. Shape sound with surgical precision with parametric EQ. SOUND AMAZING IN AN INSTANT: Choose from eight optimized sound presets, or customize your own. Simply and quickly adjust master volume and source levels. Trigger dbx Automatic Feedback Suppression (AFS) to eliminate feedback. Optimize and protect speakers with dbx Digital DriveRack signal processing. TAP INTO BLUETOOTH 5.0 FUNCTIONALITY: Advanced Bluetooth Low Energy (BLE) technology for powerful wireless control functionality and performance. Build your ideal system by mixing and matching systems and syncing up to 10 speakers. PERSONALIZE YOUR WORKFLOW: Group speakers for mixing, rename channels for traditional channel strip functionality. Responsive portrait and landscape displays streamline operation. The JBL Pro Connect app is free for life. Download today and take your stage sound to the next level tonight. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc.; any use of such marks by JBL/HARMAN is under license. For decades, top touring artists and recording studios around the world have trusted JBL speakers to express their music with power, precision and truth. Explore our full range of award-winning sound systems at www.jbl.com. Added support for JBL EON700 series speakers. Bug fixes. The concept behind this app is great but it leaves a lot to be desired as is. The touch response is flaky at best and any changes made, including muting a channel, don't sync well with the unit. I am using it with the PRX ONE and the app version showing as 0.0.0.6 is evidence that this is not mature yet. I just wish JBL would get to work on it!! I reached out to JBL and got lip service. Nothing has been done to fix the issues. I have loved my Eon One but this version is a substantial upgrade! I really love the ability to control the system remotely from my iPad. This solves a significant issue I had with my Eon One whereby you basically had to mix on stage or run an external mixer to the unit. And this unit is super beefed up from the Eon One in terms of bass, power, mixer channels and features. Very impressed! My only complaint is I cannot find any user manual for the Pro Connect app. By process of clicking and searching I'm kind of figuring things out. I had to update the firmware twice before it would connect but now seems to work. But I am not sure how to navigate the program. Not everything seems to respond when I tap on it. Controlling channel volume is pretty obvious but beyond that I'm struggling. This would likely be a 5 star review if a manual were available for the Pro Connect App. I am extremely impressed with this all in one unit. I have loved my Eon One but this PRX version is a very substantial improvement in terms of bass, overall power, and an expanded and high tech mixing console. And love the ability to control remotely with my iPad! First off, make sure all speakers are updated to the latest version or it won't work in any capacity. If the app says there's an update for your speaker available, update. Then, disconnect and forget the initial bluetooth connection through your phone's settings, turn off your speakers, and wait a few seconds. Reboot the speakers, reconnect BT, and then connect to the app. If you try connecting to the app before connecting bluetooth, things break. After you try that a few times in different orders, it works-ish. It takes way too much time to get working, but it eventually fixes itself. Once that happens, its pretty useful for EQing and transferring EQs from speaker to speaker. Only issue is that sliders are janky and unresponsive, you cant change EQs and channel gains for groups with the same speaker models within them (you can change group master tho), and the app is a little confusing to navigate with no help section or tutorial. After you get a hang of it though, its useful enough to use regularly. Note that my speakers (eon 715s) sort of didn't function quite right at some stages of the process after updating, but they fixed themselves within a few minutes and turning them off between attempts to connect. After you connect them and get the app working once, though everything works smoothly and consistently with connecting. Its a 4/5 app, but the mess of getting it to work, slider issues, and clunky navigation ruin the rating. The developer, Harman Professional, Inc., indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The developer does not collect any data from this app. Privacy practices may vary, for example, based on the features you use or your age. Learn More Developer Website App Support Privacy Policy control app for all 4 major OSes The DriveRack® PA2 provides all the processing you need between your mixer and amplifiers to optimize and protect your loudspeakers. With the latest advancements in dbx's proprietary AutoEQ™ and AFS™ algorithms, a new input delay module for delaying the FOH system to the backline, Ethernet control via an Android®, iOS®, Mac®, or Windows® device, and updated Wizards, the DriveRack PA2 continues the DriveRack legacy of great-sounding, powerful, and affordable loudspeaker management processors, for a whole new generation. AutoEQ™ New, improved AutoEQ algorithm ensures an extremely accurate, fast, and non-intrusive automatic EQ experience. With the RTA Mic "listening" to your room, the new, updated DriveRack PA2 AutoEQ algorithm sets speaker levels and room EQ automatically in a matter of seconds. This means room adjustments can now be made very quickly, without subjecting the audience to annoying, lengthy broadcasts of pink noise. Enhanced AFS™ Feedback Elimination Enhanced AFS™ algorithm for faster, more precise feedback elimination, without adversely affecting your system's tone. Nothing turns audiences away like annoying and potentially painful audio feedback. Fortunately, dbx engineers have revisited their already-stellar Advanced Feedback Suppression algorithm and made it work even better. The DriveRack PA2 listens for and anticipates feedback and adjusts speaker output automatically before it even has a chance, while never altering your sound. Updated Wizard Setup Functions Updated Wizards make initial set up easy, while ensuring speaker tunings and other settings are up-to-date. Wizard functions on the DriveRack PA2 guide you through easy, step-by-step processes to help you get the most from your loudspeaker system. Helps you easily configure level balancing, AutoEQ, Advanced Feedback Suppression, and provides access to built-in and constantly updating speaker tunings from most major speaker manufacturers. dbx Compression AFS™ (Advanced Feedback Suppression) Graphic EQ 8-Band Parametric EQ (adjusted when using the AutoEQ) Subharmonic Synthesis Crossover (supports full range, 2-way, and 3-way systems) 8-Band Parametric EQs (used for speaker tunings) dbx Limiting Driver Alignment Delays Recommended for: Installed, Portable, Tour.
