Iceman reborn worksheet

Questions for Video Iceman (Nova series) How did the Iceman body survive the difficulties of being under an ice sheet, and how could it have been found on top of a glacier? What does the Iceman's exposure advance say against the climate of the last 5,000 years? What artifacts and clothing were found in the Iceman? What is the most plausible scenario that explains the iceman's death and that his body is well protected and not consumed by predators? What evidence is there for the season of death? How long ago did he lived and how is that known? When does bronze appear in Europe? Why was the Iceman's axe made? When does copper appear in Europe? Where was a common place for settlements both north and south of the Alps at the time? Curriculum Perhaps a single human body has revealed more about life on Earth than Otzi-miraculously preserved mummy from Neolithic Europe. Pristine remains from 5,300 years ago continue to provide new information about an important time in human history. NOVA travels with artist Gary Staab to the Bolzano region of Italy, visits the Iceman in person, examines every detail of his miraculously preserved body and consults with scientists looking after the mummy. As we see the new Iceman, built with a detailed step out of resin, clay and paint, new facts about Otzi's life, genetic structure and legacy are coming to light. The world's leading Otzi experts, biologists and anthropologists will reveal their latest findings on his life and time, including never-before-seen tattoos, fresh data on his diet and medical condition, and recent DNA research that traces the Neolithic man's living descendants. In-flight rights are also available. Share This Program A new forensic investigation of a 5,000-year-old mummy is rebuilding her death and revealing an old way of life. Find out what the iceman ate before he died, about 5,000 years ago. How can bodies be mummies? See how natural forces and artificial techniques protect bodies through the ages. Bronze age swamp bodies reveal the strange beliefs of Europe's long-disappearing peoples. High-altitude archaeologists have discovered children sacrificed to the mountain gods of the Inca. Discover the complex problems that arise when a mummy is found—from whose owner to whether to put it outside... Discover an Inca burial with a bioarchaeologist and see how he collects information about the long-lost person and culture. Look at a collection of some of ancient Egypt's most remarkable preserved mummies. Archaeologist Jim Chatters tells how he put a face on Kennewick Man, a 9,000-year-old skeleton found in Washington State. On this map of northwest Europe, see where the preserved bodies were found and examine a dozen spectacular finds. What is a mummy? Take a primer on mummies around the world, from ancient Egypt to the Inca Andes to the peat marshes of the European Union...
